DETAILED ACTION

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-69 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-69 of copending Application No. 10/205,033 (US 2003/0096087.) This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

3. Claims 1-75 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-75 of copending Application No. 10/319,360 (US 2004/0091692.) This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

4. Claims 70-109 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 34-73 of copending Application No. 10/654119 (US 2004/0105971.) This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

5. Claims 76-109 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 63-96 of copending Application No. 10/654,377 (US

2004/0105940.) This is a provisional double patenting rejection since the conflicting claims have not in fact been patented

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1, 2, 6, 9-11, 18-23, 27, 31-36, 48, 50, 53-57, 60, and 64-75 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-62 of copending Application No. 10,654377. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one having ordinary skill in the art at the time of the invention to combine dependent claim limitations.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

8. Claims 1, 2, 6, 9-11, 18-23, 27, 31-36, 48, 50, 53-57, 60, 64-75 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-62 of copending Application No. 10/411,311.

Although the conflicting claims are not identical, they are not patentably distinct from

each other because it would have been obvious to one having ordinary skill in the art at the time of the invention to combine dependent claim limitations.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

9. Claims 70-75 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 34-39 of copending Application No. 10/319,326. Although the conflicting claims are not identical, they are not patentably distinct from each other because it would have been obvious to one having ordinary skill in the art that the microporous substrate was inkjet recordable.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
